Client Story*

Please give the true story of a client served this month by your programming. You may change identifying details. This allows us to connect to your programming on an emotional level.

Kaylee Ann is an eleven year old with Autism. She has sensory processing challenges and problems handling social situations. Her time coming for her lessons she was over stimulated and very excited. She was jumping up and down, talking non stop and would not let anyone, even her mother touch her to help her with anything. She ran up the mounting ramp to get on Beau for the first time and as soon as she sat down in the saddle she calmed down. She was able to take deep breaths, stay quiet and let her instructor show her with physical prompts how to hold the reins. This past month, she has grown with her lessons to be able to ask her horse to walk, halt, change directions and understand directions from her instructor. She has progressed greatly in overcoming her sensory processing challenges.
